Connect your expertise to the next decision.

Three connected interventions, demonstrated through one ring gear application.

CUSTOMER STAGE	BEFORE / PUBLIC SITE	OUR INTERVENTION	AFTER / WORKING DEMO	VALUE TO VALIDATE
01 **Get found**	 Published expertise	**Application-led content.** Mobile entry + SEO / AI foundations	 A relevant route into C&B	**More relevant inquiries.** Measure useful inquiries by source.
02 **Build confidence**	 Equipment photography	**Branded 3D + reusable assets.** Machine, component and process story	 Explore the equipment and process	**Confidence before contact.** Measure exploration to inquiry.
03 **Close the loop**	 Public contact entry	**Brief, proposal, response.** Two-step inquiry + one project record	 Quotation + a clear customer response	**An agreed next action.** Measure time to the next decision.

PRODUCTION NEXT Approved content + live receiving, identity, storage, email and quotation approvals.

Before: cbmachinery.com, captured October 29, 2026. Goals require launch measurement; no uplift is claimed.

One ring gear. One continuous conversation.

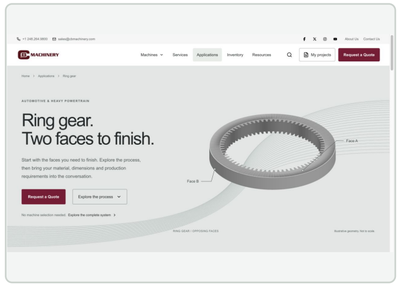

Get found. Build confidence. Close the loop. Keep the same project moving.

01

Get found

A BUYER HAS A PART

Ring gear face grinding

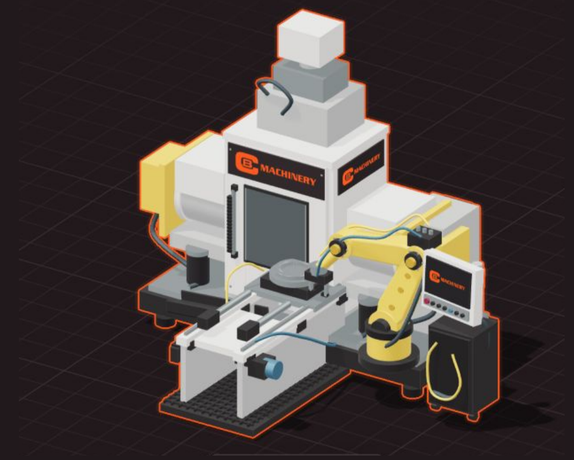

A relevant application, on any screen.

A clear next step into the machine story.

02

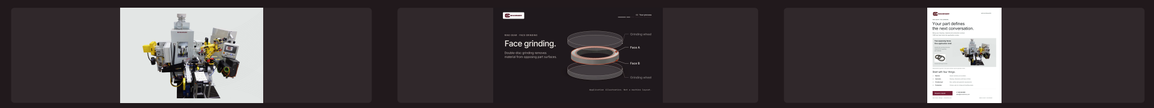

Build confidence

LIVE IN THE DEMO

Machine logo → Robot → Ring gear → Process

THE SAME STORY, READY TO REUSE

Web visual | 55-second film | Sales sheet

03

Close the loop

ONE PREFILLED CASE

Confirm the brief

Ring gear / steel

180 mm / 24 mm / 180 parts per hour

Review C&B's proposal

Scope, assumptions, pricing and terms

Synthetic demo quotation

Discuss or request a revision

CONTINUE THE RELATIONSHIP

Optional account + My projects

Revisit the same brief, shared quotation and next action.

Working demo: local records and customer responses. Model internals are schematic. No live email or commercial acceptance.
